

202 Stainless Steel Strip

Ningbo Qihong Stainless Steel Co., Ltd. is a company specializing in the production and supply of 202 stainless steel strips. The company is located in Ningbo City, Zhejiang Province. As one of the China 202 Stainless Steel Strip manufacturers and suppliers, you can have best price from our factory. After years of development, we have a excellent professional team that can provide customized services for products. Our main products include 200 series stainless steel strips, 300 series stainless steel strips, 400 series stainless steel strips and other steel. We can ensure product quality, excellent Bending, Decoiling, Cutting processing technology, stable performance.

Qihong, as a professional China 202 Stainless Steel Strip manufacturers and suppliers, welcome to wholesale 202 Stainless Steel Strip from our factory. For a better future, we will provide customized service. Welcome to buy 202 Stainless Steel Strip which is cheap from us. For more information, contact us and send you the price list now.

202 stainless steel belt is one of the 200 series stainless steel belts. The 200 series stainless steel has extremely low nickel content, and its corrosion resistance is much lower than that of the 300 and 400 series. It is impossible to distinguish it from other high nickel stainless steels with the naked eye.

The nickel content of 202 stainless steel strip is 4-6%, and the Mn content is 7.5-10%.

201/202 uses Mn-N-Ni element to replace part of Ni element to form austenite structure, which is a nickel-saving steel that alleviates the lack of nickel resources. kind. The biggest difference in the performance of 202 stainless steel strip is corrosion resistance, and its forming and welding performance is equivalent to 304.

202 stainless steel belt performance

Yield stress: 350N/m m²

Tensile stress: 700N/m m²

Elongation: 40%

Tensile strength σ_b (MPa): ≥ 520

Conditional yield strength $\sigma_{0.2}$ (MPa): ≥ 275

Elongation δ_5 (%): ≥ 40

Area shrinkage ψ (%): ≥ 45

202 Stainless Steel Strip Parameter (Specification)

Material	304 316 301 310 430 201 400 420 421
----------	-------------------------------------

Surface	N0.1, N0.4, 2D, 2B, BA, 6K, 8K, Mirror,etc
Thickness	0.02mm-4.0mm/Customized
Length	200-3500 mm or customized
Width	2-1500 mm or customizedt
Standard	ASTM, JIS, GB, AISI, DIN, BS,EN
Certifications	SGS ISO9001
Packing	Industry standard packaging or according to client's requirement
Brand	TISCO,POSCO, BAO STEEL, TSINGSHAN, QIYI STEEL etc .
Payment terms	L/C, T/T
Delivery time	Up to order quantity,contact us to know

202 Stainless Steel Strip Feature And Application

202 stainless steel has high strength, toughness, high wear resistance and greater work hardening. 202 stainless steel belt is widely used in architectural decoration, hotel facilities, shopping malls, glass handrails, public facilities and other places. It is welded by high-precision automatic pipe-making equipment, through self-etching welding, rolling and forming, without any metal filler, filled with gas protection (inside and outside of the pipe) and welded. The welding method is TIG process, and online solid solution eddy current is used. flaw detection.
